BILLING NOTES — Items to verify before submission

- **Modifier GT (Line 1)** — Telehealth platform (Doxy.me) and patient location must be documented in the claim record in addition to the progress note. ASES / Plan Vital audit this for every telehealth claim.
- **Modifier 25 (Line 2)** — E&M; billed same day as psychotherapy (90837). The progress note documents a separate and medically distinct encounter — confirm this is clearly captured in the claim before submitting to avoid Plan Vital denial.
- ✗ **Authorization #** — Prior authorization number is PENDING. Do not submit until authorization number is obtained and entered on the claim. Submitting without auth is the #1 denial reason for ASES behavioral health.
